Welcome to Clarke's Fresh Fruit

Clarke's Fresh Fruit is a family run business in Stamullen, County Meath (M1, Exit 7) growing eighty acres of strawberries, raspberries and blackberries.

Master grower Pat Clarke is a Bord Bia Quality Assured soft fruit producer who has established a reputation for the production of quality fresh fruit through dedication and experience over five decades.

Under Pat's watchful eye, an experienced team pick and pack the fresh berries daily from May to November for delivery nationwide.

Taste the Difference!

Today, the fruit is grown in scientifically designed “cosy tunnels” using a tabletop system. This means the planting and picking is done in the standing position.

Skilful crop management ensures a continual yield of top class berries. The crops are monitored closely and the staff are trained in the art of stem picking to avoid bruising the berries.

Award-winning Berries

From top class King Berries to mouth-watering delicious Baby Berries excellent flavour and freshness is guaranteed. The tasty fruit is a very nutritious and healthy addition to our daily diet.

They are the chosen berries at Áras an Uachtaráin, the President of Ireland's home and they feature on the menu of Chef Neven Maguire's MacNean House and Restaurant, Blacklion, Co. Cavan.

More than just fruit!

During the season Pat's Farm Shop in Stamullen is open seven days a week so the customers can enjoy fresh fruit straight from the plants.

A premium, award-winning jam range made exclusively from the fruit grown on the farm, is also available

Better for everyone

The goal of Clarke's Fresh Fruit is to promote quality produce while protecting the environment.

Advanced mechanisms and technologies across all areas of production increases efficiency and quality.

A computer controlled fertigation and irrigation system means each plant gets the optimum amount of nutrients and water with minimal waste.

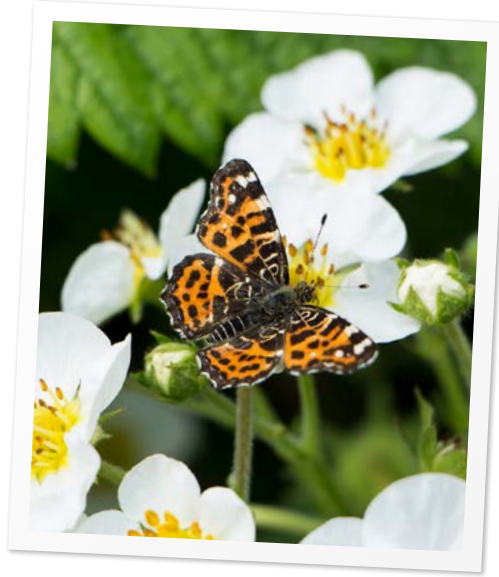
Sustainability

As members of the Bord Bia Origin Green National Sustainability Development Programme Clarke's Fresh Fruit commit to producing the fruit in an environmentally friendly way. Consistent planning has executed significant achievements in this area towards employee welfare and in relation to growing, harvesting and marketing the crops. An integrated pest management programme with natural pollination and biological pest control ensures good crop husbandry.



Solar panels installed on the fruit farm supply the total energy required for the operation on many days during the season and pumps which harness heat from the atmosphere provide superior energy efficiency.

"Growing the most wholesome and flavoursome Irish Fresh Fruit sustainably is what Clarke's is all about"

Pat Clarke

The implementation of additional tooling for heat sealing in the packing plant has reduced the amount of packaging being used significantly. An unlidded punnet made from re-cycled corrugated cardboard has been successfully introduced.

Natural Wildlife Management is a "daily delight". The many trees and hedgerows throughout the farm are home to varied species of birds, bees and butterflies.
